EDUCATION

- Dr. A.P.J. Abdul Kalam Technical University**
 - B.Tech - Computer Science and Engineering — SGPA: 7.51*
 - Relevant: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Artificial Intelligence (ongoing)*
- Lucknow, India

Nov 2022 - Jun 2026

SKILLS SUMMARY

- Languages:** Python • Go • JavaScript • TypeScript • Dart • SQL • NoSQL
- AI & LLM Stack:** OpenAI • Claude • LangChain • RAG • Vector DBs • Prompt Engineering • MCP • AI Agents
- Backend & APIs:** FastAPI • Node.js • Go • Microservices • WebSockets • REST/GraphQL
- Frontend & Mobile:** Next.js • React • Tailwind CSS • Three.js • React-Three-Fiber • Flutter
- Databases & Cloud:** PostgreSQL • MongoDB • Supabase • Redis • Pinecone • SQLite • GCP • AWS • Azure • Vercel
- DevOps & Infra:** Docker • Kubernetes • Helm • k3d/k3s • Traefik • GitHub Actions • CircleCI • Nginx
- Tools & Platforms:** Zoho Bigin • Zoho Analytics • n8n • Stripe • Razorpay • Zapier

EXPERIENCE

- CareerCraft360 (careercraft360.com)**
 - Full-Stack & AI/LLM Backend Engineer (Lead Developer)*

Remote

Sep 2024 – Present

 - End-to-End AI Platform:** Single-handedly built and maintain entire AI-powered career coaching platform using Next.js, FastAPI, and GCP
 - LLM & RAG Integration:** Implemented GPT-4o, Claude-3, vector DB for resume analysis and real-time mock interviews
 - Payment System:** Built complete subscription flow with Stripe Checkout, Billing, and webhooks (INR & USD)
 - Scalable Backend:** Designed FastAPI + PostgreSQL + Redis microservices deployed on Google Cloud Run
 - Real-time Features:** Engineered live AI interview system using WebSockets and streaming responses
- Xoidlabs (Xoidlabs.com)**
 - Software Developer Engineer Intern*

Remote

Jan 2026 – Present

 - Trukoder (Client Project Segment):** Developed full-stack website for Trukoder under Xoidlabs client projects, handling frontend (Next.js) and backend integrations, deployment, and production optimizations
 - Zapier Automations:** Built and managed Zapier-based automation workflows for client projects and internal operations, integrating CRMs, marketing tools, and data pipelines to streamline processes
 - Recapi.ai (Core Product):** Contributed to main product Recapi.ai, working closely with core team developers on both frontend and backend development, feature implementation, API integrations, and performance improvements
- ArkaHub (arkahub.in)**
 - Software Developer Engineer Intern → Full-Stack & Automation Lead*

Remote

Jun 2025 – Jan 2026

 - Zoho Bigin & Analytics Automation:** Built complete lead automation pipeline: Google Sheets → Zoho Bigin (custom modules, blueprints, webhooks) → Zoho Analytics dashboards
 - Company Portal:** Developed responsive website using Next.js + Supabase, increasing user engagement by 25%
 - Solar Design Flow:** Engineered Python-based real-time roof extraction system serving customers monthly
 - DevOps:** Configured CircleCI + Docker + Vercel/AWS pipelines, reducing deployment time by 35%
- GoPool**
 - Backend & DevOps Engineer Intern*

Remote

Jun 2025 – Aug 2025

 - High-Performance Backend:** Built scalable GoLang services with FastAPI WebSocket for real-time AI gym analytics
 - CI/CD Implementation:** Orchestrated zero-downtime deployments on Azure using Docker + CircleCI
- Monkey Science (monkeyscience.io)**
 - Full-Stack Developer Intern*

Remote, Bangalore

Nov 2023 – Jun 2025

 - Microservices Architecture:** Designed 8 scalable FastAPI microservices with Zoho Books invoicing automation
 - Admin Panel:** Built centralized admin dashboard improving backend efficiency by 30%

PROJECTS

- **Printify MCP Server:** Built an MCP server exposing 59 tools for the full Printify API — product CRUD, order management, AI design generation (Gemini + Replicate), image pipeline, Etsy keyword research, and webhook management. **Keywords:** MCP, Claude, AI agents, Printify API, TypeScript.
- **SecretEcho Plugin Generator:** Built an AI-powered platform for generating custom WooCommerce plugins via chat. Real-time WebSocket streaming, Monaco code editor, credits system, and admin panel. Live on Vercel + Render. **Keywords:** Next.js, WebSocket, AI code generation, WooCommerce, MongoDB, Redis.
- **Kuber WebStore:** Built a Kubernetes-native platform that auto-provisions isolated WooCommerce stores via React dashboard. Namespace-per-store isolation with RBAC, NetworkPolicies, ResourceQuotas, and crash recovery. Helm charts for local (k3d) and production (k3s). **Keywords:** Kubernetes, Helm, Docker, multi-tenant, system design.
- **Trading Bot:** Built a full-stack trading system for gold with live trading, backtesting (60% win rate), simulation engine, multi-timeframe analysis, sentiment analysis (Gemini AI), and Kelly Criterion position sizing. Deployed on Azure. **Keywords:** Python, FastAPI, ML, Supabase, Next.js, Azure.
- **CRM Chrome Extension:** Built a Chrome extension to extract contacts, deals, and tasks from ActiveCampaign CRM with real-time sync, search/filter, sortable tables, pagination, and CSV/JSON export. **Keywords:** Chrome Extension, TypeScript, data extraction, ActiveCampaign.
- **n8n Automation Workflows:** Created 7 ready-to-use n8n workflow templates: invoice generator, Instagram/LinkedIn auto-poster, WhatsApp AI responder, Google review alerts, uptime monitor, and lead capture pipeline. **Keywords:** n8n, automation, AI, Google Sheets, Telegram.
- **IndiaExplorer:** Built a full-featured travel booking platform with Razorpay payments, email notifications (Resend), loyalty rewards, cart/wishlist, and admin dashboard. Next.js 14 + Supabase + TypeScript. **Keywords:** Next.js, Razorpay, Supabase, full-stack, e-commerce.

CERTIFICATIONS

- **Responsive Web Design:** (View) Completed 300-hour course on FreeCodeCamp, mastering responsive design principles.
- **JavaScript Algorithms and Data Structures:** (View) Finished 300-hour FreeCodeCamp certification, building 20+ projects.
- **Front End Development Libraries:** (View) Earned 300-hour certification from FreeCodeCamp, focusing on React and Bootstrap.
- **Data Analysis with Python:** (View) Completed 300-hour FreeCodeCamp course, analyzing datasets with Pandas and NumPy.
